

Raritan & Server Technology Intelligent Rack PDUs

Proven Technology for High-Density Applications

High-Density Intelligent Rack PDUs

No matter your rack power requirements, whether standard or extra high density, Legrand offers rack PDUs designed to support compute-heavy applications.

Customer-Focused Engineering

Offering the largest team of engineers dedicated to rack power, our team collaborates with you to design and implement standard or customized solutions that address your unique challenges.

Sustainable Design Principles

Our sustainable product design principles, which focus on efficiency and circularity, help reduce environmental impact and operational costs.

Our Rack PDU Facts

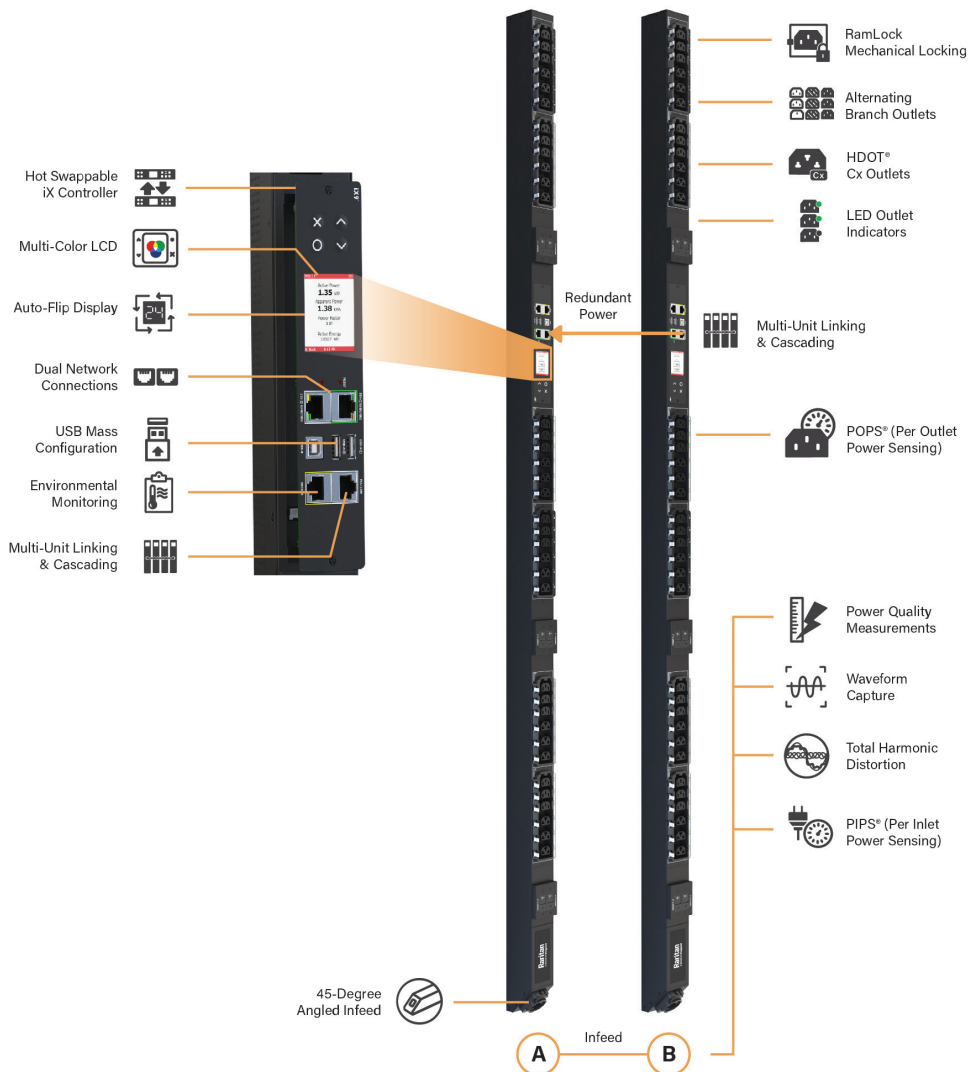

- Voltages from 208V to 480V
- Input current from 36A to 125A
- Power Capacity from 10kW to 80kW+
- Form factor from 0U to 3U
(Horizontal and Zero U Vertical Units available)
- Up to 24 20-amp breakers with 1-2 breakers per outlet
- Standard and custom models are available
- Offering both alt-phase and alt-branch designs for maximum flexibility

Trusted by AI Tech Leaders and Fortune 500 Data Centers

Legrand's Raritan and Server Technology brands are the global leaders in intelligent rack power distribution units (rack PDUs). From high-tech startups to hyperscale facilities, our PDUs are the standard for powering, monitoring, and managing high-density critical infrastructure. Supported by a global supply chain, we deliver best-in-class rack PDUs known for quality, reliability, and customer-driven innovations, including:

- Advanced Power Quality Monitoring
- Total Harmonic Distortion Measurement
- Circuit Breaker Trip Forensics
- Open API and Interoperability
- Optional Universal Input
- Enhanced Security and Encryption
