

PDU MOUNTING SOLUTIONS

SECURELY POSITION RACK-MOUNTED POWER DISTRIBUTION UNITS

Server Technology PDU Mounting Solutions ease the installation and securing of Server Technology rack power distribution units (PDUs) into the front, rear, and U space within racks, IT cabinets, and other configurations. Mounting solutions can be used vertically and horizontally to enhance a PDU's flexibility in addressing instrumentation challenges.

PDU Mounting Solutions are compatible with Server Technology PRO2, PRO3X, and PRO4X Rack PDU models. Use the kit's fit description to help you choose a suitable, secure mounting option based on the width of your PDU model.

Options include:

- Mounting buttons allow for toolless installation of PDUs.
- L or angle brackets connect two parts and offer more consistent straight corners to support both vertical and horizontal mounting positions.
- Vertical brackets molded into flat and U-shaped forms support various vertical mounting positions.
- Specialized brackets address unique mounting situations.

Not all part numbers are listed in this brochure. Please contact a representative for a full portfolio of options.

Features

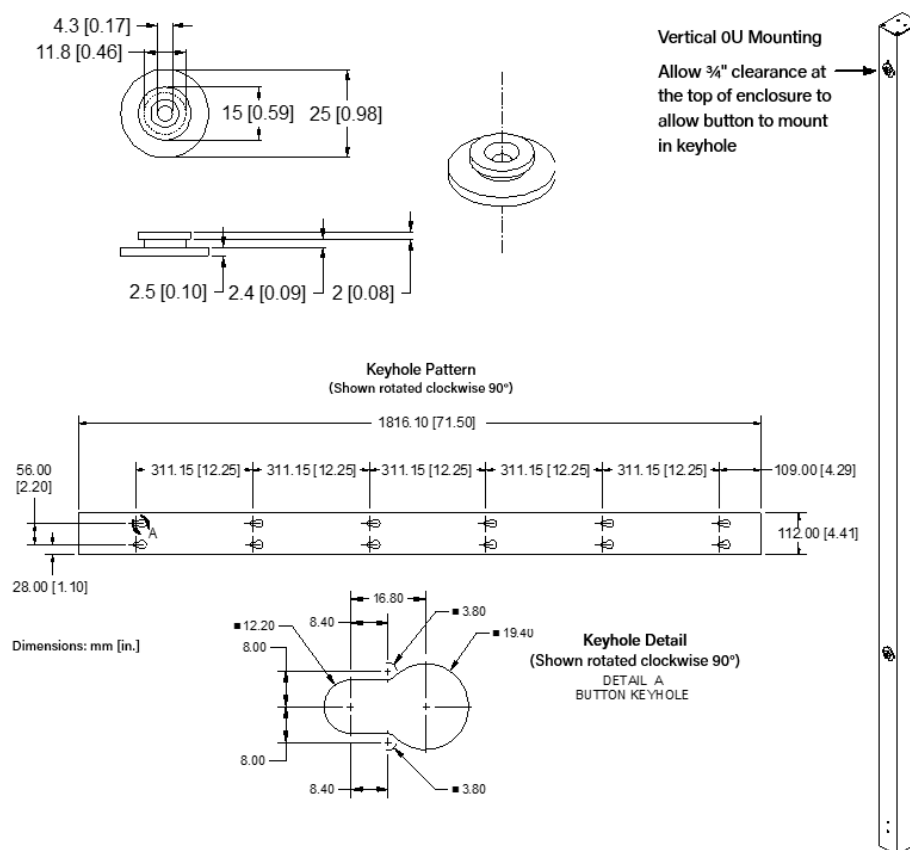

- Versatile for use in racks, IT cabinets, and other configurations.
- Options allow for vertical and horizontal mounting positions.
- Molded into various shapes to address common mounting and instrumentation challenges.
- Designed with functional holes to facilitate toolless button mounting.
