# Data center power identification issues?
Put some color on it.

Our four part PDU color system allows you to classify the input power source for your PDU connections and can minimize the risk of unintended downtime by reducing human error

Choose from six different colors at no extra charge with standard shipping time

Our selection of color PDU options are designed to help you separate, locate and brand your data center power distribution pathways. Color PDUs make it simple to identify you're A&B feeds for powering servers and other multiple-supply gear, based on redundant upstream PDU or UPS sources. Choose from our selection of color labels at no extra cost or lead time.

Choose the PDUs you need from the world's largest selection of PDUs. Then add a color to organize your data center. Our PDU labels come in 6 options: Blue, Green, White, Red, Yellow, and Black.

Our Four Part PDU Color System includes:

- Plate Label
- Interface Panel
- Power Cord Band
- Equipment Color Dot

Order your color PDUs today. Just contact your regional Server Technology sales representative and get some color in your data center.
