

**During your evaluation of this Server Technology Sentry CDU(s), the following are a few key features to consider:**

<b>CWG-Series: Switched POPS Product Line</b>	
<input type="checkbox"/>	Includes all the Features of the Switched PDU Products
<input type="checkbox"/>	Per Outlet Power Sensing (POPS) measures and displays outlet voltage (V), true RMS current (A), active power (watts), apparent power (VA), power factor, crest factor, power factor, power consumption (W-hr)
<input type="checkbox"/>	Highly accurate current, voltage and power measurements at the outlet-level
<input type="checkbox"/>	Set SNMP Traps and send email alerts for high and low thresholds for each individual outlet
<input type="checkbox"/>	View individual outlet power information within Server Technology Sentry Power Manager (SPM) application
<input type="checkbox"/>	Group and cluster outlets to view power information within SPM of a device, an application (group of devices), individual CDU, cabinet or a group of cabinets.
	View trends and reports of power information within SPM
<input type="checkbox"/>	Generate billing (kW-hr) reports within SPM
	Use power consumption information to calculate power usage and efficiency metrics
