

Star Multi-Link

A quick and easy solution to Linking Multiple PDUs

Increases the number of PDUs controlled from one IP address

Server Technology's PRO2 product line introduces the Star Linking Technology that supports the optional linking of up to 3 expansion (link) units per one PRO master unit, allowing a single IP address for up to 4 PDUs, either a single cabinet for in multiple cabinets.

Redundant Power and Communication

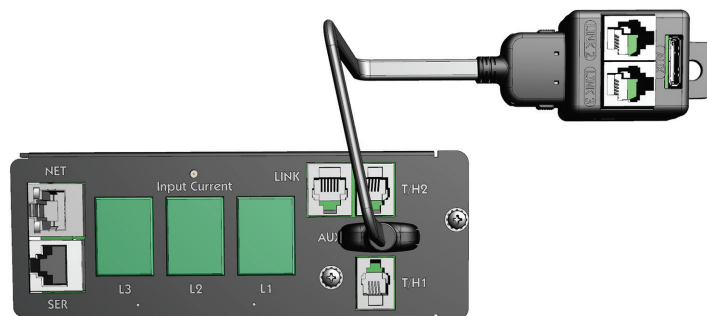

The multi-link arrangement is fault tolerant, with redundant power coming from the first link unit

Outlet Grouping

The multi-link arrangement allows outlet grouping across the master and the three link units.

Multi-Link Dongle

In the multi-link arrangement, the first PRO link units connects via the PRO link port. However the second and third link units attach to a dongle which connects to the AUX port on the master unit via a 12" (30cm) cable.
